

STUDENTS ARE OFFERED TREAT

Additional Courses Arranged for the Summer School at the State University.

LECTURES BY EDUCATORS
WELL KNOWN PROFESSORS TO ASSIST THE FACULTY.

The summer school at the state university promises to be better than ever during the coming season. There will be additional courses, and nearly the entire faculty of the college will lend its services. Professor David R. Allen, secretary of the board of regents, has issued a circular containing interesting information about the school. It is as follows:

"The University of Utah summer school, to be held at the university from June 1 to July 20, will continue its policy of expansion which has been manifest in recent years in the increase in the size and strength of its faculty and the great variety of courses given. This summer school for teachers will be given in all the subjects required by law for the state diploma—courses arranged expressly to meet the requirements of the state board of education.

Benefit to Teachers.

"Teachers are exempt from the state examinations in all subjects for which they present state university credits. Since the summer school work has been put on the same plane as the work of the regular school, the credits earned in the summer school are at once university credits. These courses as well as a great variety of others, mostly of college grade, will be given by the regular university professors, of whom there will be about fifteen teaching in the summer school.

"Professor William Stewart will offer courses in pedagogical educational psychology and methods. Dr. J. T. Merrill or Dr. L. Hartman will give courses in physics; Dr. Ebaugh, chemistry; Dr. R. H. Bradford, physical geography and geology; geology and mineralogy, as the interest of the patrons of the summer school may determine; Professor George Coray will give courses in economics, sociology and industrial history; Professor William Roylance, in United States history, general history and English history; Professor Fred Reynolds and B. R. Howell will offer high school and college courses in English; Professor Milton Ben-

THE VALUE OF CHARCOAL.

Few People Know How Useful It Is in Preserving Health and Beauty.

Nearly everybody knows that charcoal is the safest and most efficient disinfectant and purifier in nature, but few realize its value when used in the human system for the same cleansing purpose.

Charcoal is a remedy that the more you take of it the better it is not a drug at all, but simply absorbs the acids and impurities always present in the stomach and intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, drinking or after eating onions and other odorous vegetables.

Charcoal effectively cleans and improves the complexion. It whitens the teeth and acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowels; it disinfects the mouth and throat from the poison of catarrh.

All druggists sell charcoal in one form or another, but probably the best charcoal and the most for the money is in Stuart's Charcoal Lozenges; they are composed of the finest powdered Willow charcoal, and other harmless antiseptics in tablet form, or rather in the form of large, pleasant tasting lozenges, the charcoal being mixed with honey.

The daily use of these lozenges will soon tell in a much improved condition of the general health, better complexion, sweeter breath and purer blood, and the beauty of it is that no possible harm can result from their continued use, but, on the contrary, great benefit.

A Buffalo physician, in speaking of the benefits of charcoal, says: "I advise Stuart's Charcoal Lozenges to all patients suffering from gas in stomach and bowels and to clear the complexion and purify the breath, mouth and throat; I also believe the liver is greatly benefited by the daily use of them; they cost but 25 cents a box at drug stores, and although in some sense a patent preparation, yet I believe I get more and better charcoal in Stuart's Charcoal Lozenges than in any of the ordinary charcoal tablets."

The Epworth League of Mercur will give a literary programme in the church on Thursday evening.

Miss Kate Coffey, who is attending school at the University of Utah, came out last Thursday to spend a day with her parents.

nion will give history and science of education, school management (including methods of testing the hearing and vision of pupils) and ethics or logic. Professors F. J. Gibson and David Allen will offer courses in mathematics of both college and high school grade. The courses in biology, including nature study, will be given by Dr. R. T. Chamberlain; those in ancient languages by Professor R. L. McGhie; modern languages by Professor House or Mr. Wise; art by Professor Edwin Evans; dressmaking by Mrs. Root.

One Popular Feature.

"A popular feature with grade teachers will be the practical work in primary methods conducted by the training school.

WHISKY QUESTION RELATING TO INDIANS MAY PREVENT ABANDONMENT OF FORT DUCHESNE

S. M. Barlow, who has returned from a business trip through the Utah country, said yesterday he doubted that Fort Duchesne would be abandoned in view of the present conditions there, the whisky question being a serious one.

Many new people are locating their allotments on the reservation, local development being large and rapid. If the soldiers are taken away, unscrupulous liquor dealers will allow the Indians to have whisky, which the older settlers know is a very dangerous thing.

Only recently an Indian, full of fire-water, rode through a town firing his pistols in all directions. Luckily, no one was hurt, but the Indian hasn't been captured yet.

Mr. Barlow said that if a white man injured an Indian even in self-defense the tribe demands that he shall be punished. A man by the name of Muse killed a drunken Indian in self-defense at Myton. The soldiers had to rescue him from the Indians and guard

him for several days. Although he was acquitted by a jury at Heber City, he doesn't dare to return because he fears the Indians will kill him at the first opportunity.

In Myton there are five stores and five saloons. Besides this, some men have set tents up near the military reservation and sell whisky to the soldiers. The same conditions exist in other towns. In some places they sell it to the Indians now.

Mr. Barlow said that the residents are experiencing a long hard winter there with much snow. Efforts are being made to finish the Utah railroad from Dragon to Vernal this spring. This will connect Vernal with the Rio Grande road at Mack, and will make Vernal the shipping point of Ashley valley instead of Price. Mr. Barlow says that many difficulties are being encountered in building this line, about 70 per cent of it being curves, while the grade is as high as 7 per cent. In the steepest parts Shea engines will be used.

Other courses will probably be added as summer school plans expand.

"Prospective patrons will note that, as in past years, a lecture of national reputation will be present. Those having charge are already negotiating with a number of prominent educators.

"Last year the attendance was 249, with practically every county in Utah represented, and students present from all of the intermountain states and from several of the middle and eastern states. This year an earnest effort is being made to surpass all previous attendance records and even now the inquiries that are coming in from all over the west point to success in this aim."

that in the work of all rural schools should be included courses which prepare the sons and daughters of the laboring classes for their life work, thus tending to establish more and more firmly a social equality between the farmer and the professions, for, he continued, it was mentally and not occupation which separated men.

In the minds of all of the 200 present there existed the same thought so forcibly had the speaker impressed it upon them and as he ended his address a hearty applause was given.

Following this a vote of thanks was tendered the visitor and President White expressed the belief that this had been the most successful institute Beaver had known.

He had six children, four of whom are living. One of the sons was an engineer, who was killed in the Scott field mine accident in May, 1905. Dougall was long engaged in railroad contracting, although lately he has given his attention to sheep and cattle raising. He has played an important part in public life at Springville, having been city councilman, a representative to the Utah legislature four times and postmaster of Springville for several terms. quite prevalent of late, and it is to be hoped Mr. Brower has discovered the guilty party.

A. F. Acord has received a letter from his mother, Mrs. Nancy Acord, who is residing in Colonia Diaz, Mexico, in which she states that one of the greatest floods of recent years, the result of heavy rains, has destroyed much property and killed many families homeless. The fall wheat has all been destroyed and the cattle have been starved for two weeks. The Janos river, ordinarily smaller than the Provo river, and entirely dry for several months in the year, has overflowed to a width of seven miles. The letter was written Feb. 24, and it was still raining at that time.

DEATH OF MRS. HANSEN
Passes Away Mourned by Entire Community in Which She Moved.

Ephraim, Feb. 28.—On Tuesday evening at 10 o'clock death removed Mrs. Karen Hansen. The immediate cause of her death was peritonitis. Mrs. Hansen was born in Copenhagen, Denmark, on Nov. 7, 1842. She came to this country in 1871, and resided in the place which she now settled in Ephraim while it was yet a young settlement and has continued to reside here since. Mrs. Hansen was a woman of many virtues and was held in high esteem by her many friends in this city. She leaves two daughters, Mrs. J. F. McCafferty and Miss Laura Hansen. The funeral services will be held from the Mormon tabernacle Saturday afternoon at 1 o'clock.

A eulogy composed of M. F. Murray, Peter C. Peterson, Al Larsen, George A. Hild and James Armstrong was in Mt. Pleasant Monday to attend a reunion of the veterans of the holding of their annual encampment in this city during the coming summer. A plan is on foot to make it a state encampment.

PARK CITY HAPPENINGS.
Park City, Feb. 28.—The Park City fire department held its first business meeting under the new chief last evening at the assembly room of the city hall, and the department decided that a report made since the new chief was appointed was for the purpose of getting a new set of uniforms and a new set of tools. The members elected officers for the coming year. The president chosen is the present chief, and the secretary, C. A. Wade, and L. E. Hubbard was chosen as treasurer. Following this the business of a suitable entertainment for the anniversary day came up and was discussed at some length, with the result that the proposed dance was done away with and the department decided that a concert would be the better way of observing the day, and incidentally securing a little money with which to carry on the social part of the organization. The matter is in the hands of the committee and will be arranged by them and a report made at the next meeting as to what the exact nature of the entertainment will be.

The local lodge of Knights of Pythias celebrated its forty-third anniversary last evening at its hall by a celebration which consisted of a programme, musical and literary, followed by a dance. Refreshments were served and a general good time was had.

Park City is being visited by a heavy snowstorm today. The storm began this morning about 9 o'clock, and since that time the snow has been falling heavily. Roads that were breaking are again suffocated by snow, and it is feared that sleighing for some time to come.

RICHFIELD NEWS NOTES.
Richfield, Feb. 28.—At a meeting Monday of the directors of the new Sevier river water project, it was decided to build a new banking house, instead of renting the corner building of the new Jensen & Young building. A deal was made at once with Chris Poulson for thirty feet frontage on Main street, adjoining the James M. Peterson store on the south. Plans have been ordered for a two-story building, and as soon as accepted work will begin.

William Ogden, one of the school trustees, says that they have been unable to modify or revise the plans for the new schoolhouse without greatly sacrificing some of the advantages planned by the architect, and they have decided to accept the plans as first submitted, but they will not at present finish the third story, as the two lower stories will be all the room they will need for a couple of years. Contracts will at once be let.

Representatives of the parties interested in the waters of the Sevier river met in Richfield Monday to select some one to recommend for appointment as commissioner to distribute the waters of the Sevier river under the Morse decree. No agreement was reached at the meeting, but it was decided to meet again at Marysville on March 8 to take action.

Professors Yoder, Jensen and Clark of the Agricultural college will be in Sevier county this week to hold farmers' meetings. The first meeting will be held at Salina Wednesday evening, one at Monticello Thursday evening, and probably one at Elsinore Friday afternoon. Friday afternoon and evening a county farmers' institute will be held in Richfield at the court house. Everybody is invited who is interested in farming of any kind.

PROVO NEWS NOTES.
Provo, Feb. 28.—A marriage license has been issued to James Wigners of Springville, aged 36, and Nellie Johnson of Provo, aged 25.

George B. Hardy, now of Los Angeles, has commenced suit to foreclose a chattel mortgage on the Brewing company's property in this city, given Feb. 3, 1904, to secure the payment of a note for \$2,000, with interest at 10 per cent per annum. No part of the note or interest has been paid, except \$25. The note also provides for \$150 attorney fees, for which, together with principal and interest, judgment was asked.

C. W. Mount will build a pickle factory in Springville, to be in operation this summer. Plans have been made, and the farmers there for 100 acres of cucumbers, for which he pays \$20 a ton. It is reported that with proper cultivation the plant will produce from eight to fifteen tons, the average being ten tons.

D. J. Bennett of this city, employed in the construction department of the independent Telephone company, had his foot badly injured in a runaway by a motor car on Monday morning.

This morning a rock was thrown through a window of the eastbound Rio Grande Western train in the southwest part of the city and a passenger was injured by the falling glass. Special Agent Brower has been investigating the case and believes he has secured sufficient proof to convict the boy who did the throwing. This practice has become

that in the work of all rural schools should be included courses which prepare the sons and daughters of the laboring classes for their life work, thus tending to establish more and more firmly a social equality between the farmer and the professions, for, he continued, it was mentally and not occupation which separated men.

SCROFULA AN AWFUL INHERITANCE

While it is true that Scrofula may be acquired under certain conditions, it is usually inherited. Parents who are related by the ties of blood, or who have a consumptive tendency, or family blood taint of any character, are sure to transmit it to their children in the form of Scrofula. Swollen glands, brittle bones, poor digestion, weak eyes, Catarrh, emaciated bodies and general weak constitutions are the principal ways in which the disease is manifested. The blood has been diseased from birth, and being in this condition cannot properly nourish the body and Scrofula is the result. A hereditary disease like this can only be reached, by a constitutional remedy and nothing equals

S. S. S. as a cure for it. It cleanses and strengthens the deteriorated blood, drives out all scrofulous and tubercular deposits, and there is a gradual but sure return to health. S. S. S. supplies to the anemic, lifeless blood the properties necessary to build back to strong, robust health, and does this gently and so thoroughly that no signs of the disease are ever seen in after life.
